EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jong Lee (Reg. No. 36,197) on 12/14/05.

The application has been amended as follows:

IN THE SPECIFICATION:

Replace the abstract of dated 4/4/02 with the following:

"A method is proposed for etching a first silicon layer (15) that is provided with an etching mask (10) for defining lateral recesses (21). In a first plasma etching process, trenches (21') are produced in the region of the lateral recesses (21) by anisotropic etching. The first etching process comes virtually to a standstill as soon as a separating layer (12, 14, 14', 16), buried between the first silicon layer (15) and a further silicon layer (17), is reached. This separating layer is thereupon etched through in exposed regions (23, 23') by a second etching process. A subsequent third etching process then etches the further silicon layer (17, 17'). In this manner, free-standing structures for sensor elements can be produced in a simple process which is completely compatible with the method steps in IC integration technology".
